

UNITED STATES DISTRICT COURT
WESTERN DISTRICT OF WASHINGTON
AT SEATTLE

DIANE WEISS,

Plaintiffs,

v.

HOLLAND AMERICA LINE INC., a
Washington Corporation, HOLLAND
AMERICA LINE N.V., a Curacao Corporation,
and HAL ANTILLEN N.V., a Curacao
Corporation,

Defendants.

NO. C12-2105 RSM

ORDER ON SUMMARY
JUDGMENT

THIS MATTER comes before the Court on Motion for Summary Judgment by Defendants Holland America Line, Inc., Holland America Line N.V., and HAL Antillen N.V. Dkt. # 15. Plaintiff was a passenger aboard one of Defendants' cruises when she suffered an injury from a fall during an organized charity walk. Defendants move for dismissal of Plaintiff's sole claim for negligence. For the reasons stated herein, Defendants' motion is DENIED.

Factual Background

On December 11, 2011, Plaintiff, Diane Weiss, and her husband embarked on a seven day cruise aboard a Holland America Line ("HAL") vessel, the M/V WESTERDAM ("Westerdam") from Fort Lauderdale, Florida. Ms. Weiss, a then 69-year old resident of Delray Beach, Florida, is a veteran cruiser, having taken approximately 20 cruises over the

ORDER DENYING SUMMARY JUDGMENT – 1

1 past 20 years. During each of the first five mornings of the instant cruise, Ms. Weiss walked
2 with a friend for half an hour on the Westerdam's upper deck walking track, covering a
3 distance of approximately three miles. Dkt. # 16, Ex. B., pp. 18-19. Plaintiff did not
4 experience problems with her walking or balance during these routine exercises. *Id.* at p. 20.
5 During the first five days of the cruise, the Westerdam experienced generally calm seas and
6 low swell with relatively little vessel motion. *See* Dkt. # 20, ¶ 5. The wind began to pick up
7 late on December 15, 2011, increasing to "moderate" levels at 10:00am on December 16, as
8 recorded in the vessel's logs. *Id.* Ms. Weiss described the weather conditions on December 16
9 as generally "clear, a little choppy, some whitecaps," with a little wind. Dkt. # 16, Ex. B, pp.
10 22-23.
11

12 On December 16, 2011, Ms. Weiss, a breast cancer survivor, signed up to participate
13 in a walk-for-charity event, *On Deck for the Cure*, in support of the Susan G. Komen
14 Foundation. Participants in this non-competitive event aimed to walk nine laps of the
15 Westerdam's promenade deck, or three miles, though they were free to cease participation at
16 any point. Dkt. # 16, Ex. B., pp. 28-29; Dkt. # 23, Ex. F. Immediately prior to the event, Ms.
17 Weiss paid her participation fee, received her t-shirt, and listened to an introductory talk by
18 lifestylelist Nicholas Reiersgard, the crewmember in charge of the walk. Dkt. # 16, Ex. B, p. 25.
19 The charity walk began at 2:00pm and progressed without incident until Ms. Weiss had
20 completed 6 or 7 laps. At this point, Ms. Weiss reportedly felt the Westerdam starting "to rock
21 a little." As she rounded the stern and turned right toward the bow, the ship allegedly gave
22 "one big surge," at which point she lost her balance on the dry deck and hit her wrist against a
23 metal support structure as she instinctively sought to brace her fall. Dkt. # 16, Ex. B., p. 34.
24
25
26

1 She suffered a fracture to her wrist, which resulted in three surgeries, including a wrist
2 replacement. Dkt. # 19, ¶ 9. An additional charity walk participant, Herbert Basson, fell in
3 approximately the same location. He recalls that he let go of a rail that he was holding and fell
4 as the Westerdam “went for a sleigh ride.” Dkt. # 18, Ex. 4, p. 12. Neither Weiss nor Basson
5 observed other participants fall. *Id.*; Dkt. # 20, p. 35.

6
7 An hourly recording by bridge crew in the Westerdam’s NAPA log indicated that at
8 the start of the race, the wind was at 31.5 knots (nautical miles per hour), described as “near
9 gale” conditions. Dkt. # 18, Ex. 1, p. 4; Ex. 5, p. 57. The swell was described as moderate,
10 with a sea force of 5 to 6 on the Beaufort scale, and the vessel state as “pitching and rolling.”
11 *Id.* at Ex. 1, p. 5; Ex. 5, p. 53. The accident report recorded for Ms. Weiss’ injury describes
12 this pitching as “slight[]” and rolling as “gentle.” Dkt. # 16, Ex. A. Because the winds were
13 hitting the ship from the starboard quarter toward the stern, the relative wind speed
14 experienced by passengers aboard the ship was only 20 knots. Dkt. # 18, Ex. 5, p. 47.
15 According to Third Officer Marco Boere, the Westerdam had deployed one of two stabilizers
16 on December 16; two would have been deployed in the event of heavy rolling. Dkt. # 23, Ex.
17 A., p. 59. According to Third Officer Marco Boere, Westerdam officers did not institute
18 particularized safety protocols during the walkathon, but officers on watch did carry out
19 “constant monitoring of the normal weather conditions.” *Id.* at 38. These procedures authorize
20 those on watch to impose a deck ban as appropriate. *Id.* at 39. No deck ban was imposed
21 during the day of the incident.
22
23
24
25
26

Summary Judgment Standard

Federal Rule of Civil Procedure 56(a) permits parties to move for summary judgment on all or part of their claims. Summary Judgment is proper where “the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law.” Fed. R. Civ. P. 56(a); *Anderson v. Liberty Lobby, Inc.*, 477 U.S. 242, 247 (1986). Material facts are those that may affect the outcome of the suit under governing law. *Anderson*, 477 U.S. at 248. An issue of material fact is genuine “if the evidence is such that a reasonable jury could return a verdict for the nonmoving party.” *Id.* In ruling on a motion for summary judgment, the court does “not weigh the evidence or determine the truth of the matter but only determine[s] whether there is a genuine issue for trial.” *Crane v. Conoco*, 41 F.3d 547, 549 (internal citations omitted).

The moving party bears the initial burden of production and the ultimate burden of persuasion. *Nissan Fire & Marine Ins. Co., Ltd. v. Fritz Companies, Inc.*, 210 F.3d 1099, 1102 (9th Cir. 2000). The moving party must initially establish the absence of a genuine issue of material fact. *Celotex Corp. v. Catrett*, 477 U.S. 317, 322 (1986). The nonmoving party defeats a motion for summary judgment if she “produces enough evidence to create a genuine issue of material fact.” *Nissan Fire*, 969 F.2d at 1103. By contrast, the moving party is entitled to summary judgment where “the nonmoving party has failed to make a sufficient showing on an essential element of her case with respect to which she has the burden of proof” at trial. *Celotex*, 477 U.S. at 322. “[T]he inferences to be drawn from the underlying facts...must be viewed in the light most favorable to the party opposing the motion.”

Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 587 (1986). However,

1 conclusory or speculative testimony is insufficient to raise a genuine issue of fact to defeat
2 summary judgment. *Anheuser-Busch, Inc. v. Natural Beverage Distributors*, 60 F.3d 337, 345
3 (9th Cir. 1995).

4 **Analysis**

5 **A. Motions to Strike**

6 As a threshold matter, Defendants move the Court to strike both of Plaintiff's
7 proffered expert opinions. In ruling on a summary judgment motion, the Court is restricted to
8 considering evidence that is admissible. *Orr v. Bank of America, NT & SA*, 285 F.3d 764, 773
9 (9th Cir. 2002). Supporting or opposing affidavits must be based on "personal knowledge, set
10 out facts that would be admissible in evidence, and show that the affiant is competent to
11 testify on the matters stated." Fed. R. Civ. P. 56(e)(1).
12

13 Rule 702 of the Federal Rules of Evidence provides that expert testimony is
14 admissible "[i]f scientific, technical, or other specialized knowledge will assist the trier of fact
15 to understand the evidence or to determine a fact in issue." The district court's role as a
16 gatekeeper "entails a preliminary assessment of whether the reasoning or methodology
17 underlying the testimony is...valid and of whether that reasoning or methodology properly
18 can be applied to the facts in issue." *Daubert v. Merrell Dow Pharm., Inc.*, 409 U.S. 579, 592-
19 93 (1993). "This duty to act as a gatekeeper and to assure the reliability of proffered expert
20 testimony before admitting it applies to all (not just scientific) expert testimony." *Samuels v.*
21 *Holland America Line-USA Inc.*, 656 F.3d 948, 952 (9th Cir. 2011)(internal citations and
22 quotations omitted). The word "knowledge" in this context "connotes more than subjective
23 belief or unsupported speculation." *Id.*, citing *Daubert*, 509 U.S. at 590. The court's inquiry
24
25
26

1 under Rule 702 is a “flexible” one, and the court tailors its choice and application of the
2 *Daubert* factors to the “nature of the issue, the expert’s particular expertise, and the subject of
3 his testimony.” *Kumho Tire Co. v. Carmichael*, 526 U.S. 137, 150 (1999)(internal quotation
4 omitted); *see also, Samuels*, 656 F.3d at 952.

5
6 Defendants contend that Declaration of Kenneth Nemire should be stricken as he has
7 failed to establish personal knowledge or competency to testify at trial on the issues raised or
8 demonstrated that his opinions are supported by sufficient facts or data. Mr. Nemire, a Human
9 Factors Engineering Analysis consultant with a PhD in Experimental Psychology, provided a
10 declaration based on a report, opining that HAL failed to take adequate measures to mitigate
11 the hazard that allegedly caused Ms. Weiss’ injury. Dkt. ## 21, 26. The Court agrees that Mr.
12 Nemire has failed to substantiate that he is qualified to opine on the particular contexts of
13 cruise ship safety or charity walk risk management on the basis of relevant experience or
14 training. More fatally, Mr. Nemire’s report lacks an adequate basis in facts or data for the
15 conclusions that he draws regarding safety concerns for charity walks as opposed to normal
16 perambulation, the foreseeable physiological experiences of the *On Deck for a Cure*
17 participants, or the effects of vessel motion on participants related to weather conditions at the
18 time of the event. Certain of Mr. Nemire’s opinions additionally cannot be applied to the
19 facts. For instance, the motivations of participants professed in his declaration are
20 contradicted by the non-competitive nature of the event, the option to cease walking at any
21 point, and the fact that participants’ donations and receipt of t-shirts were accomplished
22 before the event began and not tied to performance. As a whole, Mr. Nemire’s conclusory
23
24
25
26

1 assertions are insufficiently helpful or supported. Paragraphs 4 through 8 of his Declaration
2 (Dkt. # 21) will accordingly be stricken.

3 The Court does not, however, agree that the Declaration of Wil Petrich suffers from
4 these same fatal flaws. Defendants contend that Mr. Petrich's opinions about the standards for
5 weather warnings and deck bans do not qualify as expert given his lack of personal
6 knowledge and further that he fails to support his conclusions with facts or data. Plaintiff
7 maintains that Mr. Petrich is well-qualified based on his 20 years of experience working on
8 passenger vessels in the Alaskan ferry system, including as Pilot and Chief Mate aboard the
9 400-foot long, 600-passenger COLUMBIA and as an able-bodied seaman on ships longer
10 than the Westerdam, as well as his maintenance of a Coast Guard license qualifying him to
11 command vessels similar to the Westerdam. Dkt. # 27. His duties on these ships included
12 making determinations about appropriate passenger safety protocols in light of weather and
13 sea conditions. *Id.* at ¶¶ 2-3. The Court is not prepared to determine that Mr. Petrich lacks
14 expertise to testify about weather-related safety procedures on the basis of this training and
15 experience on vessels similar to that at issue in this case. Concerns about Mr. Petrich's lack of
16 experience in the cruise ship industry in particular go the weight of his testimony rather than
17 its admissibility. *See e.g., United States v. Garcia*, 7 F.3d 885, 890 (9th Cir. 1993). Similarly,
18 where Mr. Petrich's opinions are non-scientific and instead based on personal experience on
19 ocean-going vessels, their reliability and consequent admissibility need not hinge on support
20 by studies and data. *See Kumho Tire Co.*, 526 U.S. at 150 ("In other cases, the relevant
21 reliability concerns may focus upon personal knowledge or experience."). The Court
22 accordingly declines to strike Mr. Petrich's declaration.
23
24
25
26

B. Negligence Claim

To prevail on her maritime negligence action, Plaintiff must establish that (1) Defendants owed her a duty of care; (2) Defendants breached that duty; (3) Plaintiff was injured; and (4) Defendants' breach proximately caused her injuries. *See Morris v. Princess Cruises, Inc.*, 236 F.3d 1061, 1070; *Samuels*, 656 F.3d at 953.

1. Duty of Care

It is well established that the operator of a vessel in navigable waters owes its passengers "a duty of reasonable care under the circumstances." *Kermarec v. Compagnie Generale Transatlantique*, 358 U.S. 625, 632 (1959). "The degree of care considered reasonable in a particular circumstance depends upon the 'extent to which the circumstances surrounding maritime travel are different from those encountered in daily life and involve more danger to the passenger.'" *Samuels*, 656 F.3d at 953, citing *Rainey v. Paquet Cruises, Inc.*, 709 F.2d 169, 172 (2d Cir. 1983). Where the condition leading to the plaintiff's claim is one that is commonly encountered and not unique to the maritime context, a carrier must have "actual or constructive notice of the risk-creating condition" before it can be held liable." *Id.* at 953, citing *Keefe v. Bahama Cruise Line, Inc.*, 867 F.2d 1318, 1322 (11th Cir. 1989). By contrast, a heightened degree of care is required where the risk-creating condition is peculiar to the maritime context. *See Catalina Cruises v. Luna*, 137 F.3d 1422, 1425-26 (9th Cir. 1998)(concluding that "where the risk is great because of high seas, an increased amount of care and precaution is reasonable"); *Kirk v. Holland American Line*, 616 F.Supp. 2d 1101, 1105 (W.D. Wash. 2007)(declining to conclude that risks associated with disembarkation are not unique to cruises); *Kearns v. Celebrity Cruises, Inc.*, 1997 WL 729108, *2 (S.D.N.Y.

1 1997)(holding that “given the rough weather attending plaintiff’s injury, [the defendant
2 cruiseline] owed an enhanced duty of care to its passengers”).

3 Defendants contend that HAL should not be held to a heightened standard of care
4 because the potential to sustain injury during a charity walk is not unique to maritime travel.
5 Defendants’ argument misses the mark. Plaintiff does not contend that the risk-creating
6 condition was the charity walk in itself but rather the occurrence of the charity walk during
7 weather conditions with rough seas, near-gale winds, and moderate swells. Unlike in *Rainey*,
8 709 F.2d 169, where a passenger tripped on a stool while dancing, the instant hazard allegedly
9 arose from the movement of the vessel, a condition that is decidedly peculiar to the maritime
10 context. Ms. Weiss and Mr. Basson both report falling as a consequence of a vessel lurch;
11 such destabilizing movement is clearly not to be expected in non-maritime settings. This case
12 is accordingly closer to *In re Catalina Cruises*, 137 F.3d 1422, in which the court held the
13 vessel operator to a high standard of care because the hazard-creating condition was specific
14 to the passage of the vessel on the high seas. Viewing the facts in the light most favorable to
15 Plaintiff, the Court determines that Defendants owed a heightened duty of care under the
16 circumstances to the charity walk participants, including Plaintiff.

17
18
19 Defendants contend that even if the degree of risk is elevated, any increase in the
20 degree of required care would be minimal. Indeed, ship records report only slight pitching and
21 gentle rolling, and neither Ms. Weiss nor Mr. Basson observed others fall in response to
22 vessel motion. Dkt. # 16, Ex. A. At the same time, the sea conditions were undeniably
23 rougher on October 16 than experienced by Westerdam passengers on previous cruise days
24 and rough enough to merit the deployment of one of two stabilizers. Dkt. # 23, Ex. A., p. 59.

1 The degree of additional risk posed by the October 16 weather conditions, and the
2 concomitant extent to which Defendants' duty of care was elevated, consequently depends on
3 questions of fact that the Court is not prepared to resolve at this stage of the proceedings.

4 **2. Breach and Causation**

5 "Summary judgment is rarely granted in maritime negligence cases because the issue
6 of whether a defendant acted reasonably is ordinarily a question for the trier of fact."
7 *Christensen v. Georgia-Pacific Corp.*, 279 F.3d 807, 813 (9th Cir. 2002). Questions of
8 foreseeability and causation in negligence cases particularly lend themselves to resolution by a
9 jury. *See Cook v. Baker Equipment Engineering Co.*, 582 F.2d 862, 865 (4th Cir. 1978);
10 *Wylar*, 348 F.Supp.2d at 1210. Such is the case here.

11
12 The Westerdam's command had a duty to reasonably foresee risks that might
13 ordinarily attend weather-related circumstances, including the risks of injury to participants in
14 an on-deck charity walk. *See Wylar v. Holland America Line-USA, Inc.*, 348 F.Supp.2d 1206,
15 1210 (W.D. Wash. 2003). While Defendants contest that Ms. Weiss' accident was
16 foreseeable, there is no question that they were aware of weather conditions as recorded on
17 the ship's logs, with a Beaufort reading between 5 and 6, winds at 31.5 knots, and moderate
18 swells. There is also no question that Defendants declined to take a specialized course of
19 action to protect the safety of the charity walk participants under these circumstances beyond
20 routine monitoring of the weather. *See Reiersgard Dep.*, Dkt. # 23, Ex. B., pp. 28-29; Boere
21 *Dep.*, *Id.* at Ex. A, pp. 38-39. Plaintiff has raised an issue of fact as to whether the waves at
22 the time of the incident could have foreseeably combined to form a larger wave capable of
23 producing a vessel surge that would destabilize an on-deck walker. *Compare Petrich Decl.*,
24
25
26

1 Dkt. # 20, ¶ 11 (“When the swell and seas come for the same general direction, the waves can
2 sometimes combine to form a larger wave.”) *with* Boere Dep., Dkt. # 23, Ex. A, p. 55 (swell
3 and wind waves “would be separate”). Plaintiff has also raised an issue of fact as to whether
4 HAL’s decision to hold the charity walk during these weather conditions or to implement
5 particularized safety procedures, including issuing a weather-specific warning to walkers, fell
6 below the standard of care. As a fact-intensive inquiry is necessary to gauge the foreseeability
7 of injury and the reasonable course of action in light of the weather conditions during the
8 charity walk, the Court cannot reach a determination on Plaintiff’s negligence claim as a
9 matter of law.
10

11 **3. Open and Obvious Risk**

12 Defendants further claim that they had no duty to warn Plaintiff of risks she might
13 encounter during the walk related to vessel motion because the sea condition would have been
14 open and obvious to her. Courts have consistently held that there is no duty to warn of an
15 obvious and apparent danger. *Samuels v. Holland America Line-USA, Inc.*, 2010 WL
16 3937470, *2 (W.D. Wash. 2010)(cruise operator had no duty to warn of risk of undertow at
17 beach as ocean conditions were open and obvious to injured wader); *John Morrell & Co. v.*
18 *Royal Caribbean Cruises, LTD.*, 534 F.Supp.2d 1345, 1352 (S.D.Fla. 2008)(cruise ship had
19 no duty to warn of obvious dangers of operating dune buggy on shore excursions). Defendants
20 contend that the risk of sustaining an injury while walking, like the risk of operating a motor
21 vehicle, *John Morrell & Co.*, 534 F.Supp. 2d at 1351, is obvious to anyone accustomed to
22 perambulating. In particular, they claim that risk of fall would have been apparent to Plaintiff,
23 who was not only a self-proclaimed experienced cruiser and walker but also had sufficient
24
25
26

1 time to appreciate the conditions during the six laps she took prior to her injury. Dkt. # 15, pp.
2 10-12.

3 The Court cannot find as a matter of law that the risk of injury from the Westerdam's
4 motion would have been open and obvious to Plaintiff. The risk to event participants was not
5 that posed during ordinary perambulation but rather that created by vessel motion resulting
6 from rough sea conditions. The question thus becomes whether risk of sudden vessel
7 movement would have been clearly apparent to event participants. Plaintiff admittedly
8 observed slightly "choppy" conditions on the day of the event, with "some whitecaps" and
9 more wind than during previous cruising days. Dkt. # 16, Ex. B, pp. 22-23. At the same time,
10 the extent of risk was not clearly obvious to an on-deck walker, experiencing wind at only 20
11 knots as opposed to the actual wind speed of 31.5 knots. Dkt. # 18, Ex. 5, p. 47. Nor would it
12 have been obvious to a passenger that the Westerdam could surge, as Mr. Petrich declares is
13 foreseeable during moderate swell conditions. Taking the facts in the light most favorable to
14 the non-moving party, the Court likewise cannot ascertain as a matter of law that the risk of
15 injury resulting from the sea conditions would have been obvious to Plaintiff.
16

17 Conclusion

18
19 This case hinges primarily on the questions of whether the relatively rough weather
20 conditions on October 16, 2011 created a foreseeable risk to participants in the *On Deck for a*
21 *Cure* charity walk event and further whether specialized safety procedures, including
22 cancellation or warning, would have been reasonable under the circumstances. As Plaintiff
23 has adduced sufficient evidence to create genuine issues of fact on multiple elements of her
24 negligence claim and for the reasons stated herein, the Court hereby ORDERS that
25

1 Defendants' Motion for Summary Judgment (Dkt. # 15) is DENIED. The Court further
2 ORDERS that Paragraphs 4 through 8 of the Declaration of Ken Nemire (Dkt. # 21) shall be
3 STRICKEN.

4 Dated this 18th day of April 2014.
